of what a muscle car is but before modern technology and stroker engines they were also the best way to make a lot of horsepower all of the detroit manufacturers had their
versions of big block engines and ford was no exception actually ford was somewhat unique in that it had two very different big block engine designs during the muscle car
era the fe engine was a design pioneered in the late 1950s primarily as a more powerful replacement for the dated y block design because cars were becoming bigger and
heavier and therefore necessitated more power to move what started as torquey engines meant to move heavyweight sedans morphed into screaming high performance
mills that won le mans and drag racing championships through the 1960s by the late 1960s the design was dated so ford replaced the fe design with the 385 series also
known as the lima design which was more similar to the canted valve cleveland design being pioneered at the same time it didn't share the 1960s pedigree of racing
success but the new design was better in almost every way it exists via ford motorsports offerings to this day in ford big block parts interchange ford expert and historian
